And FabFilter fans won't be surprised to learn that they have indeed found a way to do this. What you don't get in Pro-Q 3's dynamic bands is much control over the actual dynamics parameters. Attack, release and ratio are fully automatic, as is the threshold by default, though this can be switched to manual control.

Pro-Q now features full Dolby Atmos support (up to 7.1.2) but for the time being it's Pro Tools only. All of these things take Fabfilter's flag ship plugin ever further toward the top of the pile. Perhaps though, the most compelling reason to look at this plugin is the ridiculously effective new DynamicEQ function.

FabFilter have reinvented their Pro-L limiter for the new world of loudness normalisation. It's a sign of the times that reviews of software mastering limiters just four or five years ago would mainly have judged them on how well they made things loud, and yet today I am reviewing a limiter which I rate highly partly because of how well it allows excellent masters to be made quieter.
