Blaze Software shares this vision and bring it to reality with Blaze Advisor, its new generation of business rules engine. Blaze Software is the dominant company in the rules industry, delivering powerful rule engines that have been integrated at the heart of "mission critical" appli-

### **Technical White Paper - DePaul University**

I recently needed a simple rules engine for a project so I wrote my own (using Windows Workflow with a re-hosted workflow editor for the rule creators). It does not utilize any forward/backward chaining of rules like most of the other rule engines, just executes the rules from top to bottom against the desired .NET object.

### **c# - .Net rules engines - Stack Overflow**

I get very nervous when I see people using very large rule sets (e.g., on the order of thousands of rules in a single rule set). This often happens when the rules engine is a singleton sitting in the center of the enterprise in the hope that keeping rules DRY will make them accessible to many apps that require them. I would defy anyone to tell me that a Rete rules engine with that many rules ...
