Finding Files - GNU

This manual page documents the GNU version of find.. The command find searches the directory tree rooted at each given file name by evaluating the given expression from left to right, according to the rules of precedence (see section on Operators below), until the outcome is known; in other words, the left hand side is false for and operations, true for or, at which point find moves on to the ...

Using the Linux and Unix Command: find - Lifewire

The Linux man-pages project. The Linux man-pages project documents the Linux kernel and C library interfaces that are employed by user-space programs. With respect to the C library, the primary focus is the GNU C library (), although, where known, documentation of variations on other C libraries available for Linux is also included.

The Linux man-pages project

Sed is a stream editor. A stream editor is used to perform basic text transformations on an input stream (a file or input from a pipeline). While in some ways similar to an editor which permits scripted edits (such as ed), sed works by making only one pass over the input(s), and is consequently more efficient. But it is sed's ability to filter text in a pipeline which particularly distinguishes ...
