Flash Ttl O Manual

Manual flash vs TTL flash. For correct flash exposure, 4 things need to be controlled and balanced: – aperture – ISO – distance (from the flash to subject) – power (the flash's actual blitz of light, taking into consideration any diffusion) Two things relate to camera settings, and two things relate to the flash itself.

Manual flash vs TTL flash - Tangents

Using TTL and dialing down the flash compensation for a less harsh light will adjust the flash for you as the distance between the subject and the flash changes. Manual flash is best in scenarios where you want the most control over the light source.

What Is a TTL Flash? | TTL vs Manual Flash Modes

Pros and cons of manual flash. In situations where the distance between the flash and the subject is constant and fixed, you can opt to use manual flash settings. A manual flash is extremely useful in situations where you have to fire away a series of shots of the subject repeatedly, under similar exposure conditions.
