**FICO® Blaze Advisor**

A business rules engine is a software system that executes one or more business rules in a runtime production environment. The rules might come from legal regulation ("An employee can be fired for any reason or no reason but not for an illegal reason"), company policy ("All customers that spend more than \$100 at one time will receive a 10% discount"), or other sources.

**Business rules engine - Wikipedia**

The rules engine provides a great flexibility of the framework and easy to change and deploy. Rules engines are not to be used everywhere but need to be used when you have lot of policies where changes are inevitable on a regular basis.

**When should you NOT use a Rules Engine? - Stack Overflow**

Guys, the problem with rules that are seemingly separated from the main code but still need to be compiled, tested and deployed by IT lays in the "decision-table" mentality. BizTalk, Drools, ILog,

JBoss, InRule, Corticon, FICO Blaze - they all based on that old way of doing rules.

### **c# - .Net rules engines - Stack Overflow**

FICO's Blaze Advisor® is the leading rules engine in the market with the most advanced and flexible features to create a user friendly rules maintenance application. The tool comes with a very powerful template architecture which can be used to create highly customized web based rules maintenance applications.

### **FICO™ Blaze Advisor® Business Rules Management System**

Both of these have administration tools and other functions that make them viable options, but without the richness of IBM, Corticon or FICO, Rymer said. "Open source rules engines and rules management suites tend to be more developer-focused," said Rob Dunie, research director, BPM at Gartner.

### **Selecting the right business rules management system**

Blaze Advisor Structured Rule Language (SRL) is an easy-to-understand, English-like language. Alternative forms of the SRL syntax can be used to write rules. For example, you can refer to a property of an object by using any of the following:

### **Blaze Advisor Rules Syntax - FICO Help**

Summary: Last month we enjoyed a lighthearted look at the "Devil's Advocate View of Business Rule Engines," which puts some common (if tongue-in-cheek) words in the mouths of some of those being pitched business rules. James Taylor found some good points in that presentation, but he also finds four fallacies in the arguments that were put forth and this month he responds.
