Dry dock engineering requires special knowledge of ships and experience on the waterfront. Since our founding by Kenny Childs, whose career prior to starting Childs Engineering was based on dry dock engineering, our firm has carried that tradition on by working on marine railways, vertical lift, floating dry docks and graving docks throughout the world.

The U.S. Navy light cruiser USS Columbia (CL-56) docked in the floating dry dock USS Artisan (ABSD-1) at Espiritu Santo, New Hebrides, in January 1944. In addition, airplanes needed outposts and aircraft carriers to land, refuel, and rearm. Pivotal to all this was the need to keep the Navy supplied, armed, and afloat.

### **Repairs at Sea: Floating Dry-Docks of World War II**

Auxiliary floating drydock are US Navy floating dry docks that are able to submerge under water and be placed under a ship in need of repair below the water line. Floating drydocks then rise up under the ship raising the ship out of the water. The ship is now blocked on the deck of the floating dry dock for repair.
