First Internal Combustion Engine

An internal combustion engine (ICE) is a heat engine where the combustion of a fuel occurs with an oxidizer (usually air) in a combustion chamber that is an integral part of the working fluid flow circuit. In an internal combustion engine, the expansion of the high-temperature and high-pressure gases produced by combustion applies direct force to some component of the engine.

Yes, Brian, hydrogen combustion is not new, in fact we probably had them before we had gasoline & Diesel engines. The point is that this demo will be the first to show very low emissions...as far as we know, no one has done a truck with 100% hydrogen that has delivered performance and been low in NOx etc.
