They do hold up enough to make a good mold 325 f under 25 tons for one hour but the masters are usually junk after and will just crumble. Mold cavities do come out great. If your considering making multiple parts in fiberglass then you may want to make a silicone rubber master and a good mold release.

Re: Making a fiberglass mold Here is a "general" process of making a mold back from my old rc airplane days(and when I told the old lady that my new hobby of boats and fishing would be cheaper!!!hahahaha). LOTS, I mean LOTS of work. If your only doing one part, I would find another way. The speaker box idea, may be better suited.

the mold for the first fiberglass lay-up does require some direct labor, most molds will need less than a few hours of hands-on work. And with the accuracy of the FDM process, there will be no need for the iterative adjustment of the mold to dial in part accuracy. In general, molds are producing fiberglass lay-ups in only two to four days.
